ANNUAL REPORT

of the

COMMISSION FOR HIGHER EDUCATION

to

Governor Robert D. Orr

and the

Indiana General Assembly

March 1984

Commission Members:

Frederick T. Bauer, Chairman
Beurt R. SerVaas, Vice-Chairman
Esther D. Bray, Secretary

Samuel E. Brandon
E. Hal Davis
Donald J. Holmquist
James B. Igleheart
Robert O. Laven
Irving L. Lewin
Samuel A. Rea
Van P. Smith
Ann Wilson

Previous Members of the

Commission for Higher Education

Name	Term
Robert Anderson	1971-1978
David Baker	1971-1973
John Benbow	1971-1976
O. C. Carmichael	1971-1974
Mrs. John Corrigan	1971
George Doup	1971-1983
Grant Hawkins	1971-1978
John M. House	1971-1973
Curtis E. Huber	1972-1982
Robert A. Lucas	1971-1973
James C. McGill	1978-1982
Frank Vite	1974-1982

COMMISSION STAFF

Clyde R. Ingle, Commissioner
Wayne R. Kirschling, Deputy Commissioner

Stacey L. Gidcumb, Secretary
Gary M. Gray, Computer Applications Specialist
Nanette A. Harfst, Secretary
Susan K. Lawyer, Secretary
Debra S. McClellan, Executive Secretary
John A. Muffo, Director of Special Studies
Judith A. Redwine, Program Officer/Academic Affairs
Robert A. Scott, Director of Academic Affairs
David R. Scholz, Financial Analyst
H. Kent Weldon, Director of Financial Affairs

PREFACE

The Annual Report of the Commission for Higher Education for 1983 consists of three parts. Section I describes in narrative form recent statistical trends in higher education in Indiana. The second section contains a brief summary of the Commission's activities during the year. Section III presents a number of standard statistical reports, and selected graphs utilizing data in those reports, to partially describe higher education in the state in 1983.

The format of the Annual Report varies from those in recent years in that graphs have been added to Section III, and Section I is a narrative summary of trends rather than a topical essay.

Your comments and suggestions are solicited.

Frederick T. Bauer
Chairman

Clyde R. Ingle
Commissioner

Indiana Commission for Higher Education

HIGHER EDUCATION STATISTICAL TRENDS

1980-81 TO 1982-83

Introduction

The following is a statistical summary of recent trends in higher education in Indiana. This section of the annual report compares data compiled in the statistical tables which follow to comparable data from the 1980-81 academic year. While three academic years are involved in the comparisons (1980-81, 1981-82, and 1982-83), changes can be shown for only two time periods (1980-81 to 1981-82 and 1981-82 to 1982-83). The restricted time frame is necessary because much of the data in the Annual Report is drawn from the Commission for Higher Education's Student Information System, and some data elements, such as degrees conferred, were not available before the 1980-81 school year. Where more recent data taken from other sources are available, they are included in separate tables.

Student Enrollments

Overall Trends

Fall student headcount enrollments in Indiana increased 1.74% during the three year period from Fall, 1980 to Fall, 1982, for an annual rate of 0.86%. (See the Technical Footnote for an explanation of student headcount and full-time equivalent enrollments.) State-supported colleges and universities showed increases of 2.78% overall, or 1.38% annually, while independent institutions decreased 1.96% or 0.98% annually. The colleges offering programs of two years duration or less, Vincennes University and Indiana Vocational Technical College, had the largest enrollment increases as a group, followed by Indiana

State University-Evansville and the regional campuses of Indiana University and Purdue University. Besides the small overall decrease in enrollments at the independent institutions, enrollment declines were recorded at Indiana University-South Bend, Purdue University-West Lafayette, Ball State University, Indiana State University-Terre Haute, and Indiana University/Purdue University-Fort Wayne. Table 1 shows the data by institution. (See Tables III-A-1 and III-A-2 for enrollment data over a longer period.)

Table 1

FALL HEADCOUNT ENROLLMENT TRENDS
1980 TO 1982
BY INSTITUTION AND CAMPUS

Institution	Fall 1980	Fall 1982	Total Percentage Change	Annual Percentage Change
Indiana University	73,667	75,674	2.72%	1.35%
Bloomington	31,877	32,711	2.62	1.30
IUPUI	22,797	23,258	2.02	1.01
Regional Campuses	18,993	19,705	3.75	1.86
East	1,369	1,448	5.77	2.84
Kokomo	2,543	2,808	10.42	5.08
Northwest	4,446	4,897	10.14	4.95
South Bend	6,299	5,912	-6.14	-3.12
Southeast	4,336	4,640	7.01	3.45
Purdue University	52,577	53,050	0.90%	0.45%
West Lafayette	32,983	32,639	-1.04	-0.52
Regional Campuses	19,594	20,411	4.17	2.06
Calumet	7,229	7,719	6.78	3.33
North Central	2,183	2,544	16.54	7.95
IUPU-Ft. Wayne	10,182	10,148	-0.33	-0.17
Indiana State University - Terre Haute	12,362	11,933	-3.47%	-1.75%
Indiana State University - Evansville	3,251	3,664	12.70%	6.16%
Ball State University	19,892	19,091	-4.03%	-2.03%
Vincennes University	5,174	6,173	19.31%	9.23%
Indiana Vocational Technical College	23,661	26,298	11.14%	5.42%
TOTAL PUBLIC	190,584	195,883	2.78%	1.38%
TOTAL INDEPENDENT	53,731	52,679	-1.96%	-0.98%
TOTAL INDIANA	244,315	248,562	1.74%	0.86%

It should be noted that some of the decreases in enrollment at both public and independent institutions during this period were due to planned activities, such as the raising of admissions requirements.

Fall student headcount data, drawn from reports of the Indiana Association of College Registrars and Admissions Officers, are also available for Fall, 1983. Table 2 shows that enrollments were up by 1.08% overall in the Fall of 1983 over the same period of the prior year, and that both the public and the independent sectors showed increases. Individual institutions and campuses did show decreases, however.

Table 2

FALL HEADCOUNT ENROLLMENT TRENDS
1982 TO 1983
BY INSTITUTION AND CAMPUS

Institution	Fall 1982	Fall 1983	Percentage Change
Indiana University	75,674	76,197	0.69%
Bloomington	32,711	33,109	1.22
IUPUI	23,258	23,514	1.10
Regional Campuses	19,705	19,574	-0.66
East	1,448	1,414	-2.35
Kokomo	2,808	2,735	-2.60
Northwest	4,897	5,116	4.47
South Bend	5,912	5,638	-4.64
Southeast	4,640	4,671	0.67
Purdue University	53,050	52,881	-0.32%
West Lafayette	32,639	32,007	-1.94
Regional Campuses	20,411	20,874	2.27
Calumet	7,719	7,841	1.58
North Central	2,544	2,560	0.63
IUPU-Ft. Wayne	10,148	10,473	3.20
Indiana State University - Terre Haute	11,933	11,587	-2.90%
Indiana State University - Evansville	3,664	3,806	3.88%
Ball State University	19,091	19,223	0.69%
Vincennes University	6,173	6,492	5.17%
Indiana Vocational Technical College	26,298	27,862	5.95%
TOTAL PUBLIC	195,883	198,048	1.10%
TOTAL INDEPENDENT	52,679	53,202	1.00%
TOTAL INDIANA	248,562	251,250	1.08%

Using the other measure of student enrollment, the annual number of full-time equivalents or FTE's from 1980-81 to 1982-83, reveals a pattern similar that seen in Table 1, where headcounts are used. Independent institutions as a group declined by 2.34% during this period, while public institutions grew by 11.42% or 5.55% annually. The greater increase in full-time equivalent students as compared to headcounts may have been due to a higher proportion of students taking more courses in the latter academic year, as well as more students taking courses in terms other than Fall. For whatever reasons, the FTE figures in Table 3 show that enrollments over the three years increased at a greater rate than is suggested by the Fall headcount figures. They also demonstrate that enrollments of students increased at every institution except one, and at that university they remained essentially stable. (See Table III-A-3 for more detail for 1981-82 and 1982-83.)

Table 3

ANNUAL FTE ENROLLMENT TRENDS
1980-81 TO 1982-83
BY INSTITUTION AND CAMPUS

Institution	1980-81	1982-83	Total Percentage Change	Annual Percentage Change
Indiana University	54,308	59,982	10.45%	5.09%
Bloomington	29,402	30,378	3.32	1.65
IUPUI	13,902	17,202	23.74	11.24
Regional Campuses	11,004	12,402	12.70	6.16
East	695	811	16.69	8.02
Kokomo	1,311	1,622	23.72	11.23
Northwest	2,728	3,313	21.44	10.20
South Bend	3,529	3,553	0.68	0.34
Southeast	2,741	3,103	13.21	6.40
Purdue University	42,864	45,737	6.70%	3.30%
West Lafayette	32,053	32,785	2.28	1.14
Regional Campuses	10,811	12,952	19.80	9.46
Calumet	4,032	5,109	26.71	12.57
North Central	1,093	1,407	28.73	13.46
IUPU-Ft. Wayne	5,686	6,436	13.19	6.39
Indiana State University - Terre Haute	11,025	10,985	-0.36%	-0.18%
Indiana State University - Evansville	2,286	2,661	16.40%	7.89%
Ball State University	17,558	18,240	3.88%	1.92%
Vincennes University	4,144	5,528	33.40%	15.50%
Indiana Vocational Technical College	13,665	19,365	41.71%	19.04%
TOTAL STATE SUPPORTED	145,850	162,499	11.42%	5.55%
TOTAL INDEPENDENT*	30,049	29,347	-2.34%	-1.18%
TOTAL INDIANA	175,899	191,846	9.07%	4.44%

*The full-time equivalent statistics for independent institutions include only those 16 colleges and universities which reported total student credit hours for both years (1980-81 and 1982-83). They therefore underestimate the number of FTE students in independent institutions in Indiana.

Student Status

Student headcount enrollments drawn from Student Information System data, which are based on annual enrollments rather than those for Fall only, are shown in Table 4 for various subgroups of students at public institutions of higher education. (See Table III-A-5 for more detail for 1982-83.) It is necessary to limit comparisons to public institutions because data for independent colleges and universities are not comparable for the three years, due to varying numbers of institutions reporting each year.

As noted previously, full-time student enrollments grew at a faster rate at public institutions of higher education than did part-time student enrollments between 1980-81 and 1982-83. There were also disproportionate increases among students in the first two years of undergraduate study. These data are consistent with earlier figures showing growth greater than statewide averages at Vincennes University and Indiana Vocational Technical College, the two public colleges offering only programs at or below the associate degree level, as well as at the regional campuses with large numbers of associate degree programs.

Table 4

ANNUAL HEADCOUNT ENROLLMENT TRENDS
IN INDIANA'S PUBLIC COLLEGES AND UNIVERSITIES
1980-81 TO 1982-83
BY STUDENT STATUS

Status	1980-81	1982-83	Total Percentage Change	Annual Percentage Change
Full-time	106,095	110,190	3.86%	1.91%
Part-time	161,147	164,598	2.14	1.06
Undergraduate	219,740	230,013	4.68	2.31
First Year	86,711	95,646	10.30	5.03
Second Year	38,282	40,982	7.05	3.47
Third Year	25,568	26,571	3.92	1.94
Fourth Year	32,349	35,162	8.70	4.26
Unclassifiable	36,830	31,652	-14.06	-7.30
Graduate	47,502	44,775	-5.74	-2.91
TOTAL	267,242	274,788	2.82%	1.40%

Demographic Characteristics

Overall trends can often mask underlying changes of various subgroups. Table 5 summarizes public college and university enrollment shifts by sex, race, age, legal residence, and campus residence for the three years studied. (See Table III-A-4 for more detail for 1982-83.) This shows that female enrollment increased more than male enrollment during this period. The enrollment of Blacks and other minorities, however, declined. Students over 25 years of age increased while the number of students 25 and younger remained stable. Out-of-state student enrollments grew at a faster rate than those for residents, and the number of students living on-campus declined.

Table 5

ANNUAL HEADCOUNT ENROLLMENT TRENDS
IN INDIANA'S PUBLIC COLLEGES AND UNIVERSITIES
1980-81 TO 1982-83
BY DEMOGRAPHIC CHARACTERISTICS

Demographic Characteristic	1980-81	1982-83	Total Percentage Change	Annual Percentage Change
Sex				
Male	133,720	136,226	1.87%	0.93%
Female	133,522	138,562	3.78	1.87
Race				
Black	19,930	18,422	-7.57	-3.86
Other Minority	8,270	6,587	-20.35	-10.75
Age				
25 and younger	173,975	173,941	-0.02	-0.01
Over 25	93,267	100,847	8.13	3.98
Legal Residence				
Indiana	238,380	244,561	2.59	1.29
Out-of-state	28,862	30,227	4.73	2.34
Campus Residence				
On-campus	58,526	50,561	-13.61	-7.05
Off-campus	208,716	224,227	7.43	3.65

Degree Status

As can be seen in Table 6, student enrollments increased substantially at the undergraduate level during the three year period, with the growth concentrated in programs leading to associate or baccalaureate degrees. Graduate enrollments, particularly at the masters degree level, were declining however. (See Table III-A-6 for more detail regarding 1982-83 enrollments by level and program.)

Table 6

ANNUAL HEADCOUNT ENROLLMENT TRENDS
IN INDIANA'S PUBLIC COLLEGES AND UNIVERSITIES
1980-81 TO 1982-83
BY DEGREE STATUS

Degree Status	1980-81	1982-83	Total Percentage Change	Annual Percentage Change
Certificate	10,388	9,849	-5.19%	-2.63%

Masters	29,932	26,334	-12.02	-6.20
Doctoral	7,206	6,726	-6.66	-3.39
Unclassified -				
Undergraduate	50,758	32,658	-35.66	-19.78
Graduate	6,670	7,920	18.74	8.97
TOTAL	267,242	274,788	2.82%	1.40%

Field of Study

Just as overall enrollment shifts can mask underlying demographic differences, they also fail to show changing student interests in fields of study. Table 7 summarizes the changes in student interest by field of study over the three year period. Despite a trend of increasing numbers of students at public colleges and universities, such fields as agriculture, education, foreign languages, and library sciences had enrollment declines of over 5%. Area

studies, computer sciences, letters (i.e., humanities), interdisciplinary studies, data processing technology, health services technology, and public service technology all saw annual increases in excess of 20%. While some of the variations, such as the elimination of design technology, may be attributed to changes in the way certain institutions report fields of study, Table 7 does offer some evidence of how student program interests in Indiana have changed in recent years.

Table 7

TOTAL	267,242	274,788	2.82%	1.40%

Student Costs

The costs to students and their families of attending college rose during the three year period at both public and independent institutions. As can be seen in Table 8, average tuition rose at an annual rate approaching 15% at public institutions and 13% at independent ones. Both of these rates were above the most commonly used index of the overall cost of living in the United States, the Consumer Price Index (CPI). (See Table III-A-14 for tuition data over a longer period of time.)

Table 8

UNDERGRADUATE TUITION
IN INDIANA'S COLLEGES AND UNIVERSITIES
1980-81 TO 1982-83

	1980-81	1982-83	Total Percentage Change	Annual Percentage Change
Average Tuition - Public Institutions	$883	$1,163	31.71%	14.76%
Average Tuition - Independent Institutions	$3,269	$4,158	27.18	12.78
Consumer Price Index (CPI)*	246.8	289.1	17.14	8.23

*The Consumer Price Indexes listed are for 1980 and 1982.

From 1982-83 to 1983-84, average tuition increased 6.57% at public colleges and universities and 9.37% at independent ones, while the annual change in the Consumer Price Index was 3.2% None of the tuition figures account for housing, food, and other living expenses associated with college attendance.

Federal and State Investment in Students

Although the costs of attending a college or university are high, there are sources of funds available to help alleviate at least some of the burden on the student and his or her family. Private donors and corporations, for instance, donate funds for scholarships, usually through the institutions of higher education. Many employers also provide tuition reimbursement to employees. In addition, institutional operating funds generated by various private and public sources are used to provide financial aid to students. Two of the greatest sources of student aid funds, however, are the federal and state governments.

Federal Sources

The United States government invests directly in the postsecondary education of students by both loan and grant programs. The loan programs are subsidized in such a manner as to make loans for further study available to students at below market rates. The grant programs provide funds to students without expectation of future repayment. Table 9 shows that this latter type of federal student aid in Indiana increased almost 11.5% between 1980-81 and 1982-83, but that the increase was below the inflation rate as measured by the Consumer Price Index. During the same period enrollments were increasing as well, so that the net impact upon students was that fewer uninflated dollars per student were available to subsidize postsecondary educational costs. In addition, federal student aid funds decreased in actual dollars from $69,489,458 in 1982-83 to an estimated $67,453,880 in 1983-84, also during a period of increased enrollments, so that even fewer uninflated student aid dollars were available from federal sources. (See Table III-A-15 for student aid data over a longer period.) If data were available concerning the elimination of social security

grants for higher education and the winding down of veteran's grant programs, the decline would be even greater.

Table 9

STATE AND FEDERAL GRANT AID PROGRAMS
TO INDIANA'S STUDENTS
1980-81 TO 1982-83

	1980-81	1982-83	Total Percentage Change	Annual Percentage Change
State Grant Aid Funds	$20,430,000	$20,617,001	0.92%	0.46%
Average SSACI Grant	$941	$893	-5.10	-2.58
Federal Grant Aid Funds	$62,331,000	$69,489,458	11.48	5.59
Consumer Price Index*	246.8	289.1	17.14	8.23
Fall Headcount Enrollments	244,315	248,562	1.74	0.86
Annual FTE Enrollments	175,899	191,846	9.07	4.44

*The Consumer Price Indexes listed are for 1980 and 1982.

State Sources

Another substantial source of funds for student financial aid is the state. As mentioned previously, Indiana supplies state-supported institutions with some operating funds to be used for student financial assistance. It also provides grants to students attending public and independent institutions through the State Student Assistance Commission of Indiana or SSACI. In Table 9 it can be seen that SSACI's grant programs increased less than 1.0% between 1980-81 and 1982-83 during a period of rising enrollments and increases in the cost of living; the size of an average grant decreased over 5%. Funding for these programs was increased to $22,115,962 in 1983-84, however, yielding a 7.3%

increase over the prior year. This increase was more than double the inflation rate for 1983, but was lower than the average rate of tuition increases for the same period.

Table 10

STATE AND FEDERAL GRANT AID PROGRAMS
TO INDIANA'S STUDENTS
1982-83 TO 1983-84

	1982-83	1983-84	Percentage Change
State Grant Aid Funds	$20,617,001	$22,115,962	7.27%
Federal Grant Aid Funds*	$69,489,458	$67,453,880	-2.93
Consumer Price Index**	289.1	298.4	3.22
Fall Headcount Enrollments	248,562	251,250	1.08

*Data for 1983-84 are estimates provided by the Department of Education.
**Consumer Price Indexes listed are for 1982 and 1983.

As an example of how grant programs affect a student's net cost of college attendance, in 1980-81 the average SSACI award of $941 would have paid approximately 25% of the $3,745 cost of attending Indiana University at Bloomington as estimated by the College Scholarship Service. The same award would have covered about 13% of the $7,292 cost of attending the University of Notre Dame. By 1982-83, the $893 average SSACI award would have met less than 19% of the $4,811 cost of attending the Bloomington campus of Indiana University, and less than 10% of the $9,050 required to attend the University of Notre Dame.

State Investment in Institutions

There are several ways by which Indiana indirectly supports higher education, including the allowance of tax deductions and tax credits for contributions to public and independent institutions in the state. Student aid funds are another source, as has been noted previously. The largest state subsidies to higher education, however, are those appropriations which fall into the categories of operating and capital funds. Table 11 summarizes recent trends in these sources of funds. (See Tables III-A-16 and III-A-17 for more budgetary data.)

Table 11

STATE OPERATING AND CAPITAL APPROPRIATIONS
FOR PUBLIC INSTITUTIONS OF HIGHER EDUCATION
1980-81 TO 1982-83

	1980-81	1982-83	Total Percentage Change	Annual Percentage Change
State Operating Appropriation -				
Actual	$376,961,157	$359,350,321	-4.67	-2.36
As Budgeted	$376,961,157	$393,372,638	4.35	2.15
State Capital Appropriation*	$13,925,051	$7,424,339	-46.68	-26.98
Consumer Price Index**	246.8	289.1	17.14	8.23
Fall Headcount Enrollments	244,315	248,562	1.74	0.86
Annual FTE Enrollments	175,899	191,846	9.07	4.44

*Half of biennial appropriation.
**The Consumer Price Indexes listed are for 1980 and 1982.

It can be seen from Table 11 that capital funds, i.e., those used for construction and related activities, declined almost 50% from 1980-81 to 1982-83. Actual operating appropriations declined as well. The operating

figures as budgeted are included to show how appropriations were intended. The difference in the actual figures and those as budgeted are due to delays in payment precipitated by Indiana's fiscal problems of that time period. As Table 12 demonstrates, many of the funds delayed in 1982-83 were received in 1983-84, causing an apparent jump in the latter year. As a result of the extraordinary fiscal circumstances of this time period, the figures as budgeted more properly represent operating fund trends than do the actual figures. Even using the appropriations as budgeted, however, reveals operating increases below the Consumer Price Index changes from 1980-81 to 1982-83. In 1983-84, some of the loss to inflation of the prior time span was made up.

Table 12

TOTAL STATE OPERATING AND CAPITAL APPROPRIATIONS
FOR PUBLIC INSTITUTIONS OF HIGHER EDUCATION
1982-83 TO 1983-84

	1982-83	1983-84	Percentage Change
State Operating Appropriation -			
Actual*	$359,350,321	$413,555,503	15.1%
As Budgeted*	$393,372,638	$419,104,063	6.5
State Capital Appropriation**	$7,424,339	$8,779,422	18.25
Consumer Price Index***	289.1	298.4	3.22
Fall Headcount Enrollments	248,562	251,250	1.08

*The method of calculating operating budgets was changed between 1982-83 and 1983-84. These figures represent the best estimates of what the 1983-84 budget would have been using the method employed in 1982-83.
**Half of biennial appropriation.
***The Consumer Price Indexes listed are for 1982 and 1983.

State Investment in Faculty and Staff

Besides investing in students and in institutions, a large portion of state funds spent in higher education results in employment for Indiana citizens. Between 1980-81 and 1982-83, the average annual salary increase for continuing employees was 6.6%, while the average annual inflation rate was 8.2% for 1980-82. The 1983-84 salary increases averaged 5.1%, as against a 3.2% climb in the Consumer Price Index in 1983.

Comparative State Investment Patterns

From the above discussion, it is obvious that Indiana invests substantial resources in postsecondary education. A natural question would be how that investment compares with those of other states. Table 13 illustrates Indiana's rankings on two recent studies comparing state funding of higher education, those done by M. M. Chambers of Illinois State University and Jackie M. Johnson of the Council for Postsecondary Education of the State of Washington. The Chambers data show Indiana as ranking below the national median on all four measures he reports, and in the bottom fifth on two of these. The Johnson comparisons rank the state above the median on two measures and below on two others. (See Tables III-B-3 and III-B-4 for more detail on the Chambers rankings.)

Table 13

INDIANA'S RANKING AMONG THE 50 STATES
AS TO APPROPRIATIONS TO HIGHER EDUCATION

Measure	Rank	Source*
Combined State and Local Appropriations and Student Operating Fees per Equivalent Full-Time Student in Public Institutions (1982-83)	12	J. M. Johnson
Combined State and Local Appropriations per Equivalent Full-Time Student at Public Institutions (1982-83)	23	J. M. Johnson
Combined State and Local Appropriations per $1,000 of Personal Income (1982-83)	31	J. M. Johnson
Combined State and Local Appropriations per Capita (1982-83)	33	J. M. Johnson
Appropriations per $1,000 of Personal Income (1983-84)	34	M. M. Chambers
Appropriations per Capita (1983-84)	36	M. M. Chambers
10-Year Change in Appropriations (1983-84)	42	M. M. Chambers
2-Year Change in Appropriations (1983-84)	46	M. M. Chambers

There are two basic differences between the two studies which help to explain the divergent results. Johnson's data account for changes made after the Chambers data were published, hence they more accurately portray what has occurred. A second difference is that two of Johnson's measures are based on the number of full-time-equivalent students being served. Consequently, states with high participation rates in postsecondary education will tend to rank lower in her comparisons than those with lower participation rates, since the latter will be spending proportionately more per student than the former. The inclusion of student fees, as opposed to state fees only, is another departure which tends to push Indiana higher in the first ranking reported in Table 13.

One possible explanation of why Indiana ranks low on some relative comparisons of support of higher education is seen in rankings released by the U.S. Bureau of the Census. In 1981, Indiana ranked 40th of 50 states in tax revenues per capita, 49th in state and local government expenditures per capita, and 50th in state and local debt per capita. As a result, the state can, as in Fiscal Year 1983, spend over 20% of all state appropriations for higher education, and still rank relatively low on most comparisons to other states.

Conclusion

The pattern that emerges for higher education in Indiana over the three year period studied is one of increasing enrollments in the face of lower constant dollars being available from state funds for operating costs, capital projects, and student financial aid. The overall enrollment increases tend to mask underlying shifts in the makeup of the student population; there were fewer minority students in 1982-83 than in 1980-81, for example, and more students over 25 years of age and enrolled full-time. Trends such as those observed in the recent past will require careful monitoring in the next few years, since changes in demographics, the economy, and other forces external to higher education will undoubtedly impact the colleges and universities of the state.

Technical Footnote:

Student enrollments in higher education are normally measured in two ways: by headcount and by full-time equivalent. Headcounts refer to the number of individual students counted at any one time, usually in the Fall term or after the completion of an academic year. Undergraduate full-time equivalents or FTE's are computed by dividing the number of student credit hours taught in a term by 15, on the assumption that the average undergraduate student takes 15 hours per semester or quarter. Graduate FTE's are computed by dividing the number of student credit hours per term by 12. Total annual FTE's would be the sum of the FTE's for each term. The number of student credit hours for each class is computed by multiplying the number of students in the class by the number of credit hours assigned to the class.

SECTION II

COMMISSION ACTIVITIES DURING 1983

COMMISSION MEETINGS

The following is a synopsis of the activities of the Indiana Commission for Higher Education during the 1983 calendar year. The Commission met in regular session on these dates.

January 14	Indianapolis
March 11	Indianapolis
April 8	Indianapolis
May 12	Indianapolis
June 16-17	Indianapolis
July 7-8	Indianapolis
August 24	Indianapolis
September 8-9	Vincennes
October 14	Indianapolis
November 10-11	Terre Haute
December 8-9	Indianapolis

ACADEMIC AFFAIRS

Commission Actions on Degree Programs. In 1983, the Commission and its staff acted on four proposals submitted during 1982, and on 44 proposals submitted during 1983. In carrying out its review responsibility, Commission staff worked with the State Board of Vocational and Technical Education in the review of new vocational-technical program areas and options in accordance with the principles, policies, and procedures which were updated in October 1981. This cooperative review, which emphasizes the examination of broad program area categories, has reduced the number of new program options brought to the Commission. In addition, the use of the routine academic decision item mechanism has assisted in speeding up the process of review.

Table II-A shows Commission actions during 1983.

Reviews of Existing Programs. The enabling legislation for the Commission includes responsibility for reviewing all existing degree programs. In 1978, the Commission requested all state institutions except Indiana Vocational Technical College (IVTC) to select programs for review--with all programs to be reviewed every six years--and to report to the Commission each July on the findings of the reviews. Vocational-technical programs offered by IVTC and other institutions are reviewed by the State Board of Vocational and Technical Education (SBVTE) every five years according to policies and procedures promulgated in the Indiana State Plan for Vocational Education. The Commission cooperates with the State Board in the development of review procedures, thereby obviating the need for separate institutional reviews of the same programs. In 1983, reports of the reviews of 226 degree programs were received. It appears that nearly all programs will have been reviewed during this first six-year cycle by 1984 as scheduled. As a result of this process, additional revisions have been made to the Academic Program Inventory.

Regional Needs Studies. During 1983, the Commission worked with public and independent institution officials as well as with civic, corporate, and union leaders to study the needs and opportunities for higher education and training in 36 counties in southern Indiana. Indiana Farm Bureau officials, Chamber of Commerce leaders, mayors, labor union officials, educators, institution trustees, and others were asked to comment on a Commission-compiled statistical profile of the region and the State, and on the following items:

(1) College and university services in their area which were especially deserving of commendation;

(2) Unmet high priority needs for education and training at the college and university level;

(3) Additional opportunities for cooperation between colleges and universities and the business-civic community (e.g., technical assistance to small businesses, consultation on and help with community planning and economic development, community support for college-level programs, collaborative efforts to raise new resources to meet new needs, etc.); and

(4) College and university programs which, in their judgment, seemed to overlap or duplicate other services.

The observations and recommendations of the study were discussed at several public meetings, and final recommendations were adopted by the Commission on November 11, 1983. Five key recommendations were adopted concerning (a) governance arrangements at Indiana State University-Evansville, (b) the availability of degree programs in engineering and engineering-related technologies, (c) the uses of technology in the delivery of higher education services off-campus, (d) activities at Columbus and Jasper, and (e) community requests for programs and resources. The results of the study will help in the development of budget recommendations for 1985-87 and to update the Indiana Plan for Postsecondary Education.

Additional copies of the report's executive summary, which has been distributed widely, are available from the Commission office.

Follow-up to Previous Regional Studies. Recommendations included in the Commission's studies of northwest and northeast Indiana have been followed up in several ways. Of special interest is the General Assembly's appropriation of a planning grant for the further examination of postsecondary education

needs and opportunities in the greater Elkhart area. The Commission has monitored the progress of the planning study and has advised the Elkhart planning committee. The final report of the study and Purdue University's request to offer a degree program in Elkhart will be on the Commission Agenda during Spring 1984.

Higher Education Services Planning 1984-87. The Commission for Higher Education is charged with the responsibility "to develop, continually keep current, and implement a long range plan for post-high school education" in Indiana. Such a plan should take into account institutional missions, anticipated enrollments, programs and services, financial implications, and the interests of the state's independent institutions. The Indiana Plan for Postsecondary Education published in 1973 was the first step in this planning process. The Commission introduced the Higher Education Services Plans in 1983 as one source of information to be used in the preparation of an updated version of The Indiana Plan.

The higher education services planning process is intended to be a state review of needs and opportunities which is informed by institutional capacities, plans, and needs in advance of each biennium's budget requests. The Commission's objective is to develop a process which is useful not only in discussing plans developed by institutions in anticipation of future circumstances, but also in engaging state leaders in the task of identifying state needs which can be addressed through higher education.

The higher education services plan is designed to build upon existing campus planning efforts, program reviews, accreditation reports, and similar

exercises. It is anticipated that it will contribute to a revised and updated statewide plan and will set the context for the Commission's evaluation of 1985-87 budget submissions. In addition, it will result in specific recommendations and other actions as appropriate.

Higher Education Services Plans from the six state colleges and universities and 25 independent institutions were presented to the Commission on December 9, 1983. These plans will be reviewed with institutional representatives and an analysis of them presented to the Commission for discussion and possible action in April 1984. In its review of plans, the Commission will emphasize three principal concerns: (1) the context for higher education in Indiana; (2) the mission, role, and scope of Indiana's public institutions; and (3) particular institutional plans.

Program Start-Up Fund. The Program Start-Up Fund was created to make it possible for the state to fund needed programs which were approved and started between biennial budget sessions. In the first cycle of the Program Start-Up Fund, however, it played an additional role: it served its original purpose and also served as the source of Program Change funding not provided during the biennial session.

Forty-one institutional requests for instructional programs and community-business partnerships totalling $6.7 million were received. Twenty-five requests totalling $3.4 million were recommended for consideration by the State Budget Committee as it decided on the allocation of the $2 million Fund. A list of the programs funded is attached as Table II-B.

Academic Program Inventory. The Academic Program Inventory is the official registry of instructional degree programs at public colleges and universities and includes the roster of programs offered at independent institutions and private career schools. The inventory is updated as frequently as changes are made to it, and new institutional records are sent whenever changes are made. Once each year, a new volume is sent to each campus. In 1983, a version of the inventory was prepared for distribution by TEDS (Training and Educational Data Service) to schools and other sources of educational counseling. The TEDS version is organized by broad instructional program categories and shows the institutions which offer each academic program by degree level.

FINANCIAL AFFAIRS

The first four months of 1983 were spent working with individual members, committees and staff of the General Assembly and Budget Agency as higher education funding levels for the 1983-85 biennium were considered and decided. The computer-based system developed in 1980 by staff to aid in budget preparation and presentation was used many times by the General Assembly to assess the impact of different funding assumptions on the state appropriation level for higher education. One special development was a simplified computer model to summarize historical investments in postsecondary education, and to forecast needed future investments in postsecondary education.

Since the end of the 1983 session, the Financial Affairs staff has been working with public higher education institutions on the 1982 equipment inventory and expenditure study, the Fall 1983 facilities inventory and space utilization study, the 1982-83 cost study, and Fall 1983 and Annual 1983-84 student information system enrollment submissions. All of these will be used for a

variety of special reports and in the analysis of the 1983-85 operating and capital budget requests.

During 1983, over fifty capital projects have been reviewed by Commission staff. Financial Affairs staff have worked extensively with other staff on two major office efforts: the Southern Indiana Regional Study and the initial analysis for the Program Start-Up Fund which was authorized by the 1983 General Assembly.

STAFF CHANGES

During 1983, two staff members were appointed by the Commission.

Clyde R. Ingle	Commissioner
John A. Muffo	Director of Special Studies

One staff member left the Commission during 1983.

George B. Weathersby	Commissioner

1984 MEETINGS

The following 1984 meeting dates and locations have been approved by the Commission.

January 12-13	Indianapolis (Governor's Conference on January 12)
February	No Meeting
March 8-9	Indianapolis
April 12-13	Indianapolis
May 7	Indianapolis
June 7-8	Indianapolis

Meeting dates for the remainder of the year will be set at the Commission's July, 1984 meeting.

FALL HEADCOUNT ENROLLMENT BY CAMPUS AND YEAR

Source: Annual editions of Report of Enrollments in Indiana Colleges and Universities, prepared for the Indiana Association of Collegiate Registrars and Admissions officers by T. N. Gunderson.

Notes:

[1]Purdue totals include all enrollment for IUPU-Fort Wayne.
[2]Concordia Senior College closed in Fall 1977.
[3]The Fort Wayne Art Institute became part of IUPU-Fort Wayne beginning in Fall 1976.
[4]Grace College and Seminary enrollments are combined for IACRAO reports.
[5]Occasionally totals differ from those reported in Table III-A-1 because of enrollment updates by several institutions.
[6]Northwood Institute closed in Fall, 1983.

Notation: (--) Means data were not available.

Source: Commission for Higher Education Student Information System. Credit Hours are semester credit hours as reported by institution. FTE, full-time and part-time designations are computed by Commission for Higher Education.

The notation (--) indicates data were not available.

Unlike Tables 1 and 2, this and succeeding tables report annual enrollments rather than fall enrollments. In general, these annual statistics will reflect substantially larger headcounts than the comparable fall measurements.

Source: Commission for Higher Education Student Information System. Reported enrollments for Indiana public institutions are comprehensive; reported enrollments for independent institutions cover 24 institutions. Student origin is determined from the student's zipcode at the time of entry to an institution.

Source: College Entrance Examination Board, Public Reports and Unpublished Computer Printouts. Data provided here are intended as basic information about the Scholastic Aptitude Tests, and not as an analytical comparison between groups of students. For an extended discussion of appropriate comparisons, the reader is directed to A Comparison Study of the College Board Scholastic Aptitude Test Scores Between Students in Indiana, the Midwestern Region, and the Nation, by J. P. Lisack.

[1] The column labeled "Percentile" indicates where a student with the specified average score would be with respect to the nationwide distribution of SAT scores. Thus, a person with a verbal score of 425 is at the nationwide mean (i.e., 50% percentile); the average Indiana senior has a verbal score of 410 (or the 44th percentile).

[2] Prospective applicants are those seniors taking the SAT test and requesting their scores be sent to particular institutions.

[3] Includes all public university campuses (Indiana University, Purdue University, Ball State University, Indiana State University, Indiana University-Purdue University at Indianapolis).

[4] Includes Indiana University-East, Purdue University-North Central, and Vincennes University.

Source: Commission for Higher Education. The fees cited are for undergraduate, in-state students, and reflect the charges per full-time equivalent student. These fees include instructional, academic facilities, and dedicated/designated fees for undergraduate, resident, full-time equivalent students. It should be noted that this will not necessarily correspond to the fees charged to a full-time student, and will vary somewhat from the fees used by the State Student Assistance Commission in computing student aid awards. Data for years prior to 1976-77 are not fully comparable to the figures shown above. Data for independent colleges and universities are from Independent Colleges and Universities of Indiana, Inc. All tuition figures are for full-time, degree-credit resident enrollment.

Source: Commission for Higher Education
Institutional Budget Request Data

Notes:

[1] Amounts reported are actual unrestricted student fees, before netting out academic facility fees.

[2] Includes amounts appropriated by the General Assembly for debt service as "fee replacement" or as "interim financing."

[3] 1975-76 general operating appropriations include $2,486,187 of funding from a separately-appropriated Enrollment Contingency Fund.

[4] General operating appropriations for 1982-83, 1983-84, and 1984-85 are "as budgeted" and exclude all roll-over effects.

[5] 1982-83 general operating appropriations for Purdue-Calumet and IU-East include special appropriations for nursing programs.

[6] 1983-84 and 1984-85 general operating appropriations exclude distributions made under the Program Start-Up Fund.

[7] 1983-84 general operating appropriations are larger than would normally be the case due to the inclusion of some retirement funds in institutional base budgets; these were appropriated separately in previous years.

[8] 1983-84 and 1984-85 amounts are estimated by the institutions.

[9] 1984-85 general operating appropriations include equipment replacement funding made available by the 1984 General Assembly.

[10] General operating appropriations shown for Vincennes University exclude Knox County Matching appropriated by the General Assembly.

[11] 1976-77 general operating appropriations for Vincennes University exclude $825,000 of appropriated deficiency funding.

Source: B-3 reports provided by public institutions. All Percentages cited above include the regional campuses for each institution. Percentage increases from year to year are based on the budgeted increases in total salary dollars for specified groups of employees. (NA) means data were not available.

[1]Continuing Employees are defined as those employed in each two consecutive academic years.

The College Cost Book, 1983-84 Fourth Edition, The College Board.

[1] Includes annual tuition and general fees an institution charges most first-year, full-time students.

[2] Includes tuition and fees, books and supplies, room and board, transportation, and other expenses.

TABLE III-B-2

HOW INDIANA RANKS AMONG THE 50 STATES
ACCORDING TO THE 1980 CENSUS

Item	Rank
Total Population	12th
Land Area	38th
Population per square mile	13th
Percent change in population, 1970-1980	35th
Median age	30th
Non-white population proportion	30th
Metropolitan population proportion	20th
In-migration proportion, 1975-1980	42nd
Divorce rate per 1,000 population, 1979	9th
Physicians per 100,000 population	42nd
Personal health care expenditures per capita, 1978	30th
Home ownership rate	5th
Median value of owner-occupied housing units	39th
Crime rate per 100,000 population, 1981	37th
Public elementary and secondary schools, 1981 -	
Expenditures per capita	43rd
Current expenditures per pupil	41st
Public school teachers' salaries, 1982	19th
Percent high school graduates (persons 25 and older)	32nd
Undergraduate enrollment in institutions of higher education, 1979	13th
Civilian labor force, 1981	12th
Unemployment rate, 1981	4th
Manufacturing employment proportion, 1979	6th
Average weekly earnings of manufacturing production workers, 1981	6th
Per capita income, 1979	24th
Percent below poverty level, 1979	42nd
State and local government expenditures, 1981 -	
Expenditures per capita	49th
Tax revenues per capita	40th
Debt per capita	50th
Federal government expenditures per capita, 1981	49th
Energy consumption per capita, 1980	6th
